

Implementation of New Elements Marc 21 Update No. 12, 13 and 14

[Return to Implementation of New MARC 21 data elements page.](#)

Sections 1 and 2 of this announcement identify data elements from Update No. 12 (October 2010) Update No. 13 (September 2011) and Update No. 14 (April 2012) to the MARC 21 Formats for Bibliographic and Authority data which became valid or were redefined in LAC's AMICUS September 2012.

Sections 3 and 4 identify data elements for which there are no current implementation plans.

This information will be of interest to users of AMICUS catalogue records, MARC Records Distribution Service (MRDS) subscribers and libraries contributing to the union catalogue. This information is provided to assist in evaluating the impact on automated systems as these elements could be present in records found on AMICUS; this does not necessarily mean that these elements will be actively supplied by Library and Archives Canada cataloguing staff. Many of the changes in this update have been made in preparation for implementation of the new cataloguing rules, Resource Description and Access (RDA).

Data elements in bibliographic records are fully documented in the [MARC 21 Format for Bibliographic Data](#). Elements in authority records are fully documented in the [MARC 21 Format for Authority Data](#)

1. New and Changed Bibliographic Data Elements

The following data elements from Updates No. 12, 13, 14 to the MARC 21 Format for Bibliographic Data became valid in LAC's AMICUS September 2012. This information is provided to assist in evaluating the impact on automated systems as these elements could be present in records found on AMICUS; this does not necessarily mean that these elements will be actively supplied by Library and Archives Canada cataloguing staff.
